

# Elevating Sensorial Experiences through Revolutionary Gummy Technologies

## ABOUT US

### Who We Are

We are a leading provider of contract manufacturing services in advanced gummy technologies for the global nutraceutical industry.

### What Drives Us

Inspired by sophisticated artisan candy-making procedures that highlight the essence of our product and powered by top-of-the-line technologies that ensure the most elevated sensorial experiences and quality standards, Funtrition® is proud to be driven by Art and Science.

We are **Art & Science**

## Our Purpose Having fun innovating in consumer experiences for well-being.

### WHY FUNTRITION® ?

1

Extended manufacturing and development capabilities through our different **Columbiana** and **USA**.

2

Improved formulation development in innovative flavors and textures with **300+ gummy formulations** developed and **50+ new gummy launches** every year.

3

Key partners in portfolio renovation, **delivering a variety of gummy technologies** to offer consumers an exceptional experience.

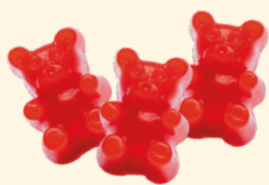

4

Quality system **based on industry-leading regulatory expertise** with more than 6 certifications.

## Inspiration Center

Our **Inspiration Center** is the hub for our gummy creation process! From formulation ideas being taken to our pilot plant to be tested and improved, to diverse innovative gummy technologies being researched and developed, our **IC is where Art & Science combine to create!**

## Our Technologies

**GummyGels™:** Since gelatin is one of the most popular gelling agents, gelatin gummies are widely recognized and enjoyed by consumers around the world. With its transparent, bright, and attractive appearance, this technology offers an effective blend of ingredients and a powerful sensorial experience. It is also very versatile, as it allows a **great variety and quantity of ingredients to be mixed in the formula**, as well as specialized dietary options, including **sugar-free and low-sugar options**.

Our plant-based technology, **Pec-G™**, offers a short, clean bite and slightly elastic texture, making it convenient for those who have difficulty chewing, such as children and older adults. Pectin has the ability to **enhance and exalt fruit flavors**, resulting in an explosive sensorial experience. It also allows for natural extract actives to be easily incorporated in the formula, complimenting the already natural product. Pec-G™ is highly preferred when wanting to develop a **gummy that is suitable for vegetarians**.

Our **Agar-G™** gummy technology offers plant-based gummies with a non-sticky texture that allows for a clean and slightly rough bite. Since agar has **no taste, no odor, and no color**, it offers the possibility of incorporating colors and flavors. Due to its nature, it also allows for **minerals to be easily integrated in the formulas, creating indulgent and nutritional bites**.

**GummieX™** is one of our most disruptive technologies, consisting of the development of formulas with a mixture of hydrocolloids to achieve the perfect gummy! This technology is designed to obtain the desired texture and flavor by carefully selecting the right matrix of gelling agents. It's not only adaptable, but also has the added benefit of not needing cold shipment, due to its ability to **resist extreme temperatures**. GummieX™ can also be the solution to cost and technical issues that emerge in product development. Besides being an asset for customers, it **offers an incredible performance** for consumers.

Under Development\*

**Fill-G™** is our center-filled gummy technology that delivers a unique and incredible sensorial experience. With an amazing sense of chewiness, it offers the possibility of incorporating ingredients that couldn't normally be incorporated, making it an ideal solution for **actives sensitive to temperature or pH**, both animal and plant based. Fill-G™ is a unique delivery system for **actives not common in the gummy world**.

Under Development\*

**Layer-G™** offers two layers and double the fun! **Bringing a unique two-in-one sensorial experience that combines the best of traditional gummies and aerated gummy technologies**, Layer-G™ offers the possibility of integrating different types of actives within the same gummy. With a delightful velvety feel and a distinct texture in each layer, this technology is a powerful sensorial journey in itself!

Under Development\*

Whether it's animal or plant-based, **Air-G™** focus on stable minerals provides the ideal conditions for a nutrient-rich formulation. **Light, fluffy and visually appealing, this technology offers fun vibrant colors and unique mastication experience**.
