

Achieve **Xtreme** Performance

With a **114% year-on-year growth**, the most significant growth in the **Performance Nutrition** category was recorded by **Creatine!***

Traditionally known for **supplying energy to muscle cells during exercise, increasing muscle strength and promoting a quick post-workout recovery**, Creatine has become an **essential supplement for fitness enthusiasts** looking to improve their **overall performance**.

“However, the category is attracting **new demographics, like women and older consumers**, who are learning that this supplement can also aid in **supporting a generally active lifestyle and an overall healthy aging**.”*

With **X-treme Performance** we harness the potential of creatine into the single most popular supplement delivery format^{**}: gummies. With a **153% increase in sales in the US, between 2017 and 2021^{***}**, gummies have become one of the most convenient and indulgent ways to consume nutritional supplements.

Powered by our proprietary **technology Pec-G™**, **Xtreme Performance** is a **plant-based option** that seamlessly incorporates **natural ingredients, highlights fruity flavors**, and offers a short clean bite ensuring an **easy and enjoyable mastication experience**.
