It's A Lifestyle, Not Just A Diet

According to Mintel, Consumers are not only embracing vegan diets but are also looking for vegan alternatives in all aspects of their lives. Over the last five years, the share of vegan launches within total food & drink and beauty & personal care launches has doubled to 6%.¹

At the same time, a growing number of “flexitarians” who commit to reducing meat intake while increasing the plant-based part of their diets, has led to the boom of plant-based alternatives.²

A whole new sensorial experience!

Seeing a gummy as a chewable dosage form means an important challenge related to consumers' sensorial experience:
